

# RIPPER/ PIPE LAYER/ HOSE REEL

REMOVABLE  
FACE PLATE

Proudly Australian Made

The Delmade Heavy Duty Ripper/Pipe Layer/Hose Reel unit is available in three configurations:

- The Standard 105mm Unit
- The Large 150mm Unit
- The 'Deep Digger' Hydraulic Unit

The 105mm Heavy Duty Ripper / Pipe Layer / Hose is an extremely effective combination implement capable of laying 50mm (2") poly pipe, along with most fittings and joiners.

There is no need to unroll the pipe before laying it. It simply fits on the reel, saving up to half the time usually taken to lay pipe using a traditional ripper.

## HOW MUCH COULD YOU SAVE? 'WORK SMARTER NOT HARDER'

## FEATURES

- Ripper is solid steel billet, 150mm x 50mm
- Mk II removable reversible ripper point, 230 x 100 x 16mm
- Pipe-layer is fabricated from steel plate (rather than tube) and is hinged on ripper tine for manoeuvrability
- Free-standing with two fully adjustable legs
- Removable pipe-layer face-plate provides easy access to pipe and fittings during pipe-laying operations.
- Std Pipe-layer has 105mm internal clearance for large pipe including most common fittings and joiners.
- Optional Hose Reel attachment with hydraulic height adjustment. Large rolls of poly pipe are easily loaded when reel is lowered. When fully raised to vertical position, the pipe unrolls directly into the inlet of pipe layer.

Other sizes can be made to order

PRODUCT CODE	PRODUCT	WEIGHT (KG)	WORKING DEPTH	REQUIRED HORSE POWER	TRACTOR MOUNTS	MAX PIPE SIZE		HOSE REEL SIZE		
						WITH FITTING INSIDE DIAMETER	WITHOUT FITTING OUTSIDE DIAMETER	MAX OUTER DIA.	MIN INNER DIA.	MAX WIDTH
DRP1396	105 mm Ripper/Layer/Reel	352	700mm	60+	3PL Cat 2	50mm	100mm	MAX OUTER DIA.	MIN INNER DIA.	MAX WIDTH
DRP1405	150mm Ripper/Layer/Reel	-	700mm	75+		63mm	130mm			
DRP1391	Hyd Ripper/Layer/Reel	-	1000mm	120+		50mm	100mm	2800mm (9'2")	400mm (1'4")	500mm (1'8")

### 150mm Ripper Pipe Layer

The 150mmØ Ripper Pipe Layer is designed for applications where a larger pipe size is required.

The 150mmØ Ripper Pipe Layer features the same heavy duty design as the 1050mm unit. With a larger internal clearance.

### BENEFITS OF THE DELMADE RIPPER/ PIPE LAYER / HOSE REEL

- Quality design and manufacture for tough demanding Australian conditions.
- Rip drainage and pipe channels. Excellent for running trough pipes.
- Save time and money by turning a two or three man job into a one man operation.
- The pipe layer is of very smooth construction to prevent pipe bending and kinking. It does **not** feature layer rollers which tend to kink the pipe causing issues with the pipe rupturing and bursting as it ages.
- Easy load reel to accommodate modern pipe reels.
- Hydraulic lifting arm, letting the tractor do the hard work.
- All units come standard with an MkII extra heavy duty ripper point. Manufactured exclusively by Delmade the ripper point is the result of years of design research and field trials. The extra heavy duty strength of the unit means it is suitable for laying km's of pipe in difficult conditions. Other less heavy duty points bend and chip in harsh and demanding conditions.

### Hydraulic 'Deep Digger' Layer

The Hydraulic 1000mm depth Ripper Pipe Layer is designed for the harshest conditions. Where a consistent trench depth is critical. Known as the 'Deep Digger' this ripper pipe layer uses a hyd 3PL frame to achieve a depth of up to 1000mm.

### Ripper/ Pipe Layer

The Delmade Ripper Pipe Layer can be purchased as a standalone unit. This unit includes the Heavy Duty Ripper and MkII extra heavy duty ripper point.

### DON'T FORGET.

With a DELMADE Ripper Pipe Layer you can do the job with LESS passes, LESS men, LESS hours and LESS physical strain = LESS money.

Before you head out and do it the hard way take the time to run the numbers and let DELMADE help you to lay your pipe the safest, most time and cost effective way.
